WELCOME ADDRESS

Dear Colleagues,

*The Italian Committee members of the COST Action FA1404 are pleased to host, for the first time here in Foggia, the MANAGEMENT COMMITTEE MEETING AND 1st COST CONFERENCE on Improving current understanding and research for sustainable control of the poultry red mite *Dermanyssus gallinae* (COREMI).*

*The overall aim of COREMI is to generate a synergic/holistic approach to improving the health, welfare and productivity of the 350 million laying hens, through more effective prevention and control of *Dermanyssus gallinae*, the Poultry Red Mite (PRM). This will be achieved by cooperation and multidisciplinary networking between scientists and other stakeholders from the different member states and from different disciplines, thus making the European poultry industry more competitive with other leading countries.*

COREMI plans to consolidate the existing expertise and knowledge in order to gain better understanding of PRM and its economic and social impacts, and to use this information to implement more efficient and sustainable control methods.

The choice of Apulia Region as the venue stems from its significant traditions of research on Animal Husbandry and Health thanks not only to its two Universities, the Zooprohylactic Institute, and other Research Institutions (CNRs, Center for Research and Experimentation in Agriculture), but also to its poultry farms and qualified technicians and professionals.

The Congress Plenary Session is open to all world scientists interested in this topic and will take place in the attractive Auditorium of the former church of Santa Chiara in Foggia, while the Management Committee (MC) Meeting (for MC members only) will be held at the Department of Science of Agriculture, Food and Environment, University of Foggia.

WE WISH YOU A NICE STAY IN FOGGIA!
